3. Value of Domestic Exports by Commodity Groups - Country and Region of Customs Clearance cross-classified by Mode of Transport	3. Valeur des exportations nationales par groupes de marchandises - Pays et région de dédouanement, recoupée suivant le mode de transport 20
4. Value of Re-Exports - Country and Region of Customs Clearance cross-classified by Mode of Transport	4. Valeur des réexportations - Pays et région de dédouanement, recoupée suivant le mode de transport 161
5. Quantity of Domestic Exports for Selected Commodity Groups - Country and Region of Customs Clearance cross-classified by Mode of Transport	5. Quantité des exportations nationales par groupes spéciaux de marchandises - Pays et région de dédouanement, recou- pée suivant le mode de transport 163

1. Nature of Report:

This publication presents statistics on domestic exports and re-exports according to the last means of transport used in shipping the goods from Canada. Any commodity exported to an overseas destination but shown as leaving Canada by road or rail will have passed into the United States, thence moving by sea or air to the overseas destination. On the other hand, any commodity shown as leaving Canada by air or water can be considered as a direct shipment from a Canadian port.

2. Presentation of Data:

Four principal modes of transport are covered in this report:

- 1. Water Transport (includes ship and barge)
- Road Transport (includes truck, car and bus)
- Rail Transport (includes railway express, even if the express company has moved the goods by road)
- 4. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

The addition of two supplementary summary tables to this publication raises the total to seven. The first is a summary of the value of domestic exports by country by mode of transport; the second, a supplement to Table 1, is a summary of domestic exports by Region of customs clearance by mode of transport; the third is a summary of total exports (domestic and re-exports) by country and mode of transport; the fourth, a supplement to Table 2, is a summary of domestic exports by region of customs clearance by mode of transport; the fifth details the value of domestic exports in each commodity group to each country and from each region of customs clearance by mode of transport; the sixth shows the total value of re-exports as one commodity group to each country, from each region of customs clearance and by mode of transport; the seventh shows the quantities of domestic exports for those groups where it is available, in the same detail as table 3.

1. Nature du rapport:

La présente publication fournit des données sur les exportations nationales et les réexportations, suivant le dernier mode de transport emprunté pour expédier les marchandises du Canada. Toute marchandise exportée outre-mer mais expédiée du Canada par route ou par chemin de fer a été envoyée en premier lieu aux États-Unis puis expédiée outre-mer par bateau ou par avion. Par contre, toute marchandise expédiée du Canada par avion ou par bateau peut être considérée comme une expédition directe d'un port canadien.

2. Présentation des données:

Quatre principaux modes de transport sont compris dans le champ du présent rapport:

- Le transport par eau (comprend navires et chalands)
- Le transport par route (comprend camions, voitures et autobus)
- Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
- Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

Deux tableaux récapitulatifs ont été ajoutés, ce qui porte leur nombre à sept. Le premier tableau donne la récapitulation des valeurs des exportations nationales, par pays et par mode de transport; le deuxième, qui complète le tableau I, donne la récapitulation des valeurs des exportations nationales, par région de dédouanement et par mode transport; le troisième donne la récapitulation de l'ensemble des ex-portations nationales et des réexportations, par pays et par mode de transport; le quatrième, qui complète le tableau 2, donne la récapitulation des exportations nationales, par région de dédouanement et par mode de transport; le cinquième montre la ventilation des exportations nationales par groupe de marchandises, par pays de destination, par région de dédouanement et par mode de transport; le sixième indique la valeur totale de l'ensemble des réexportations, par pays de destination, par région de dédouanement et par mode de transport; enfin, le septième tableau indique le volume des exportations nationales par groupe de marchandises, lorsque les chiffres sont connus, la ventilation étant celle du tableau 3.

3. Source of Data:

Export documents collected by
Customs are the basic source of export
statistics, except for data on electricity
and on crude petroleum exported by pipeline. Electricity exports are reported
by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies
directly to the Dominion Bureau of Statistics.

4. Time Periods:

Export statistics for any period include all goods declared on export entries received at DBS during the period, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Electricity reports can usually be included in statistics for the period in which the exports actually occurred. Reports of pipeline exports of crude petroleum only arrive in time for inclusion in statistics for the month following the month of actual export.

5. Coverage:

- (a) Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
- (b) Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
- (c) Exclusions: The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy which is included in commodity group 880 and a small amount of gold scrap in the form of jewellers' sweepings which is included in commodity group 256-; current coin; settlers' effects; private

3. Source des données:

La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

4. Périodes de temps:

La statistique des exportations pour une période quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au BFS durant la période et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur l'électricité peuvent être habituellement inclus dans la statistique de la période durant laquelle les exportations d'électricité ont effectivement eu lieu. Les rapports sur l'exportation de pétrole brut par oléoduc arrivent à temps seulement pour figurer dans la statistique du mois suivant celui où l'exportation a vraiment eu lieu.

5. Couverture:

- a) Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada, de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.
- b) Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le tri ou le remballage ne modifient pas l'état des marchandises importées.
- c) Exclusions: Les mouvements de marchandises suivants sont exclus de la statistique des exportations: l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire qui sont inclus dans le groupe 880, et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers, qui est comprise dans le groupe 256; la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les

donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

6. Countries Credited:

Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

7. Régions of Clearing:

The regions appearing in Tables 1A, 2A, 3, 4, and 5 are: Atlantic, Quebec, Ontario, Prairies and Pacific. Exports shown for each region include goods cleared through customs in the provinces shown below.

Region	Provinces of
	Clearance
Atlantic	Newfoundland Nova Scotia Prince Edward Island New Brunswick
Quebec	Quebec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacific	British Columbia Yukon

Customs clearance in a particular region should not be taken as indicating that the goods originated in that region; inter-regional movement may have and in many cases will have occurred prior to Customs clearance. Origin statistics are more closely reflected in data on exports by region of lading which is not published but is available in the form of machine tabulations on a cost recovery subscription basis.

achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

6. Pays de destination:

Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

7. Régions de dédouanement:

Les régions de dédouanement prévues dans les tableaux 1A, 2A, 3, 4 et 5 sont les suivantes: celle de l'Atlantique, le Québec, l'Ontario, les Prairies et la région du Pacifique. Les exportations indiquées à l'égard de chaque région compremnent les marchandises dédouanées dans les provinces ci-dessous:

Région	Province de dédouanement
Provinces de l'Atlantique	Terre-Neuve Nouvelle-Écosse Île du Prince-Édouard Nouveau-Brunswick
Québec	Québec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacifique	Colombie-Britannique Yukon

La région de dédouanement n'indique pas obligatoirement l'origine d'une marchandise; les marchandises peuvent avoir été transportées d'une autre région avant de passer à la douane, c'est même un cas très fréquent. L'origine des marchandises apparaît avec une plus grande précision dans les statistiques sur les exportations par région de chargement qui ne sont pas publiées mais que l'on peut obtenir sous forme de tableaux mécanographiques auxquels il est possible de s'abonner au prix coûtant.

8. Quantities:

The final table of this publication shows quantities in terms of the units specified in the Export Commodity Classification, Volume I, Cat. No. 12-521, except the unit for commodity groups 71 and 91 which has been changed to hundredweight from pounds because of table design. For certain commodity groups, notably "Cereals, unmilled", conversions have been made to a common unit of quantity to allow showing quantities which could not otherwise have appeared. Where no quantity data is collected or quantity information is in unrelated units that commodity group will not appear in the quantity table. The quantity shown for commodity groups largely composed of classes that specify quantity but also containing few that do not and for groups incorporating classes that contain both whole units and parts, cannot be related to the value (see below). Such groups are identified, in the quantity table, by an asterisk to the right of the unit of quantity designation. It is felt, however, that omitting the quantity entirely for such groups would eliminate data useful to some users of these statistics.

Units of weight or volume relate to the weight or volume of the goods and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts. In groups where both complete units and parts are included, the average value per complete unit can not be calculated. No quantity information is shown for re-exports since these are treated, herein, as comprising one commodity group.

9. Values:

Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

10. Abbreviations:

Many descriptions of countries and commodities used in this report are abbre-

8. Quantités:

Le dernier tableau du présent rapport donne les quantités selon le système d'unités de mesure stipulées dans la publication intitulée Export Commodity Classification, Vol. 1, dont le numéro de catalogue est 12-521, à l'exception de l'unité de poids applicable aux groupes 71 et 91, où on a substitué le qtl à la livre, à cause de la disposition du tableau. Dans le cas de certains groupes de marchandises, notamment les céréales non moulues, les quantités ont été converties en une unité commune, afin de permettre la mention de quantités qu'on n'aurait pu indiquer sans cela. Dans les cas où on n'a pas collecté de données quantitatives ou encore où ces données sont en mesures différentes, le groupe de marchandises ne figure pas dans le tableau. Il est impossible de rapporter à la valeur les quantités données pour des groupes de marchandises constitués en majeure partie de classes dont la quantité est précisée, mais qui comprennent aussi quelques classes à l'égard desquelles on ne la précise pas, de même que pour les groupes pour lesquels les chiffres comprennent les articles complets de même que leurs pièces (voir ci-dessous). Dans le tableau de quantité, ces groupes sont identifiés par une astérisque placée à droite de l'unité de quantité. Nous croyons, néanmoins, qu'en omettant complètement les quantités relatives à ces groupes, on éliminerait des données qui peuvent être utiles à ceux qui font usage de cette statistique.

Les unités de poids ou de volume visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces. Pour les groupes où les données visent également des articles complets et des pièces, il est impossible de calculer la valeur moyenne de l'article complet. On ne donne pas de quantités sur les réexportations, vu qu'elles sont considérées, aux fins de la présente publication, comme un groupe de marchandises.

9. Valeurs:

Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.). Cette définition établirait donc la valeur des exportations f. à b. point de destination; mais, en réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années, une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

10. Abréviations:

Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport

viated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

11. Comparability with other statistical $\underline{\text{series}}$:

Users may wish to compare the export statistics appearing in this report with the transportation statistics produced by the Transportation and Public Utilities Division of DBS. While External Trade statistics are compiled from export entry forms (B-13's) submitted by exporters, those of the Transportation Section are derived from reports submitted by carriers. This basic difference in source material provides an opportunity to view the movements of goods from Canada from two distinctly different angles.

Export statistics are basically a commodity value record. Volume, weight or size of export shipments is secondary, since such quantity information is not at present always available on export documents, nor always presented in a common unit. Accordingly, value provides the only measure by which all exports may be assessed. Transportation statistics, on the other hand, are primarily concerned with gross tonnage of goods moved and with revenue received by the carrier in respect of such movements.

While direct comparison cannot always be made, it is generally possible to account for major differences in the data presented. For example, Canadian trade statistics covering the export of some metal ores show the quantity of metal contained in the ore, while transportation statistics show the gross tonnage of the ore movement.

Another factor making direct comparisons difficult is the inclusion in transportation statistics of a category described simply as "General Cargo" or "General Freight" where knowledge of commodity content is limited. No such general category exists in Canadian trade statistics since every export must be described as to commodity.

Differences of the types outlined above range across all modes of transport

sont abrégées ou incomplètes. La clef des abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans Export Commodity Classification Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

11. <u>Comparabilité avec les autres séries statis-</u> tiques:

Il se peut que les utilisateurs de la statistique des exportations publiée dans le présent rapport désirent la comparer avec la statistique sur les transports que publie la Division des transports et des services d'utilité publique du BFS. Bien que la statistique du commerce extérieur soit calculée à partir des formules (B-13) d'inscription des exportations, remplies par les exportateurs, celle des transports est fondée sur les rapports des transporteurs. Cette différence fondamentale entre les sources des données permet d'observer le mouvement des marchandises du Canada de deux points de vue très distincts.

La statistique des exportations constitue fondamentalement un dossier de la valeur des marchandises. Le volume, le poids ou la dimension des marchandises exportées représentent des aspects secondaires, vu que ces renseignements ne sont pas, à l'heure actuelle, toujours inscrits sur les documents relatifs aux exportations, ni ne sont-ils toujours donnés à partir d'une mesure commune. En conséquence, seulement la valeur monétaire constitue une mesure commune de toutes les exportations. La statistique des transports, par contre, porte principalement sur le poids brut de marchandises transportées et sur les recettes que touchent les transporteurs à cet égard.

Bien qu'il ne soit pas toujours possible de comparer les chiffres directement, on peut généralement concilier les différences importantes qui surviennent entre les données soumises. Par exemple, la statistique du commerce canadien visant les exportations de certains minerais donne la quantité de métal que contient le minerai, tandis que la statistique des transports donne le poids brut de minerai transporté.

Un autre facteur qui rend difficile toute comparaison, c'est l'inclusion dans la statistique des transports d'une catégorie désignée simplement comme "marchandises diverses"; on dispose ordinairement de peu de renseignements sur la nature précise de ces expéditions. Il n'existe pas une telle catégorie générale dans la statistique du commerce, vu que chaque marchandise d'exportation doit être décrite précisément.

Les différences de ce genre se retrouvent dans tous les modes de transport; mais on peut

but reconciliations can usually be worked out for water and rail, where transportation statistics do provide considerable commodity detail. Exports by air cannot be compared as the Transportation Section does not collect commodity data for this mode of transport. In road transport, commodity detail in transportation statistics is minimal and comparisons, therefore, are rarely possible.

Comparability in respect to pipeline movements of crude petroleum and
natural gas, and the movement of electrical energy across the border will be very
close since External Trade statistics
and those produced by the Energy Statistics Section are derived from the same
sources. There are some movements of
crude petroleum and natural gas by modes
of transport other than pipeline; these,
of course, must be considered in the
light of the limitations of comparability
outlined for those other modes of
transport.

ordinairement établir la réconciliation dans le cas des transports maritime et ferroviaire, où la statistique des transports décrit les marchandises avec beaucoup de détail. Il est impossible de comparer les exportations par avion, vu que la Section des transports ne recueille pas de données sur les marchandises expédiées par ce mode de transport. Dans le cas du transport routier, le détail des marchandises par rapport à la statistique des transports est peu considérable et, en conséquence, la comparaison est rarement possible.

Le rapprochement de données concernant le mouvement par pipe-lines du pétrole brut et du gaz naturel et le transport d'énergie électrique outre-frontière, seront très étroits, vu que la statistique du commerce extérieur et celle que prépare la Section de la statistique de l'énergie sont fondées sur les mêmes sources de données. Le pétrole brut et le gaz naturel sont également transportés autrement que par pipe-lines; dans ces cas, naturellement, la comparabilité est restreinte par les facteurs exposés ci-dessus, relativement aux autres mode de transport.
